

THREE STEPS TO COST-EFFECTIVE HOME FLOOD PROTECTION

Complete these 3 steps to reduce your risk of flooding and lower the cost of cleanup if flooding occurs. For items listed under step 3 check with your municipality about any permit requirements and the availability of flood protection subsidies. *Applicable only in homes with basements

Step 1: Maintain What You've Got at Least Twice per Year

Remove debris from nearest storm drain or ditch & culvert

plumbing, fixtures and appliances

Test your sump pump*

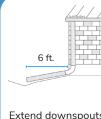

backwater valve

Step 2: Complete Simple Upgrades

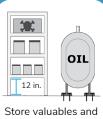

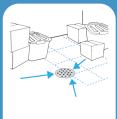

permit)*

Extend downspouts and sump discharge pipes at least 6 ft. from foundation

hazardous materials in watertight containers & secure fuel tanks

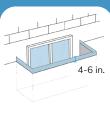

Remove obstructions to floor drain

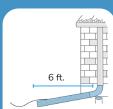

Install and maintain flood alarms

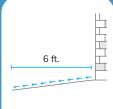

Step 3: Complete More Complex Upgrades

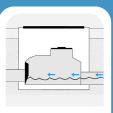

Install window wells that sit 4-6 in. above ground and upgrade to water resistant windows*

Disconnect downspouts, cap foundation drains and extend downspouts to direct water at least 6 ft. from foundation

Correct grading to direct water at least 6 ft. away from foundation

Install backwater valve

Install backup sump pump and battery*

Note: Not all actions will be applicable to each home. Completing these steps does not guarantee the prevention of flooding.
